Summary

Final-year BCA student at MDS University, Ajmer with strong hands-on experience in full-stack web development using the MERN stack. Built and deployed real-world web applications, including a Task Management System with secure JWT authentication and payment integration using Stripe and Razorpay. Proficient in React.js, Node.js, Express.js, and MongoDB, with practical experience in REST API development, CRUD operations, and backend architecture. Certified in Google Cloud fundamentals and completed a data analytics simulation with Deloitte Australia. A quick learner with strong problem-solving skills, seeking an internship or entry-level developer role to apply and grow technical expertise.

Education

MDS, University
Ajmer

Bachelor of Computer Application • 2024-2027

Projects

Real-Time Chat Application 3 Months

Developed a real-time chat application using the MERN stack, enabling one-to-one and group messaging with instant updates. Implemented secure user authentication using JWT and integrated Socket.io for real-time communication. Built features such as typing indicators, online/offline status, and message notifications. Designed a responsive and user-friendly interface with efficient state management and optimized backend APIs.

Technologies Used :-

- Frontend: React.js, CSS / Tailwind
- Backend: Node.js, Express.js
- Database: MongoDB
- Real-time: Socket.io
- Authentication: JWT
- Tools: Git, GitHub, Postman

Built a real-time delivery tracking system using the MERN stack to monitor order status and live location updates. Integrated Google Maps API to display delivery routes and current positions, along with estimated delivery time (ETA). Implemented real-time communication using Socket.io for instant tracking updates and status changes. Developed role-based dashboards for users and admins, ensuring smooth order management and tracking experience.

Technologies Used :-

- Frontend: React.js, Tailwind CSS
- Backend: Node.js, Express.js
- Database: MongoDB
- Real-time: Socket.io
- Maps & Location: Google Maps API
- Authentication: JWT
- Tools: Git, GitHub, Postman

Skills

Frontend :-

HTML, CSS, JavaScript, React.js, Tailwind

Backend :-

Node.js, Express.js, Python

Database :-

MySQL, MongoDB

DevOps & Tools

Git & Github, SVN, Jenkins (CI / CD), Ngnix, Postman, Linux, NPM, Netlify, AWS

🔗 Soft Skills :-

Problem Solving, Adaptability, Team Collaboration

Certifications

Cloud Technical Series - OnBoard Edition

February 2026

Google Cloud Asia Pacific

Completed The Cloud Technical Series - OnBoard Edition by Google Cloud Asia Pacific, gaining Exposure to Generative AI, AI Agents, Cloud Computing, DevOps, and Data Engineering. Participated in Hands-on labs and Technical Sessions focused on modern cloud infrastructure, Application Development, and Deployment practices.

Data Analytics

February 2026

Deloitte Australia Data Analytics Job Simulation on Forage

- Complete a Deloitte job Simulation involving data analysis and forensic Technology.
- Created a data dashboard using Tableau.
- Used Excel to classify data and draw bussines conclusions.
